

## Tips for your final presentation

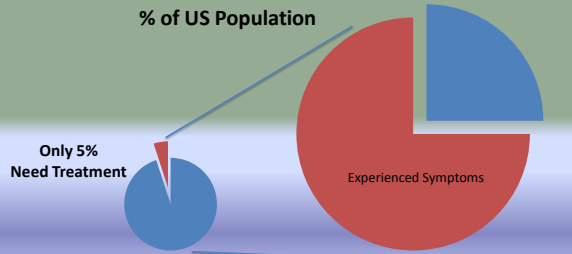

This is the “improve” portion of your final project. The goal of this presentation is to summarize the results of your assessments and lesson plan. Not only is this good practice for you, but we hope these projects will help improve the BEAM program as a whole!

In preparation of your presentation, please consider answering hitting the following points (notice the similarity to a standard research/lab paper):

- Introduction: self-explanatory
- Methods:
  - What was your final lesson plan?
  - How are you assessing the effectiveness of your lesson plan?
  - How are you assessing the entire semester of mentoring?
- Results/ Discussion:
  - How did your lesson plan go?
  - What would you improve on your lesson plan?
  - Present results of your assessments?
- Conclusion:
  - Did you notice any trends?
  - Remind us of your interesting results.
  - Give overall recommendations to the BEAM program.

### 3 Rules to your PowerPoint presentation\*

1. Do not read from the slides or from the projector screen!
2. Max 15 words per slide! See example below.
3. Practice makes perfect!

Before: bad slide	After: much better!
<p><b>Temporomandibular joint disorder (TMJD/TMD)</b> a.k.a. <b>TMJ syndrome</b></p> <ul style="list-style-type: none"><li>– An estimated 75% of the US population has experienced one or more signs or symptoms of TMD.</li><li>– Most people with TMD have symptoms that come and go over time and can be self-managed at home.</li><li>– However, about 5% of people with TMD have more severe symptoms and will need professional treatment.</li></ul> <p><small>Sources: &lt;<a href="http://www.nationalpainfoundation.org/articles/879/facts-and-statistics?PHPSESSID=961783542e00e5ecb2816ee07685f196">http://www.nationalpainfoundation.org/articles/879/facts-and-statistics?PHPSESSID=961783542e00e5ecb2816ee07685f196</a>&gt;</small></p> <p>There is too much text on this slide and the slide is boring.</p>	<p><b>Temporomandibular joint disorder</b></p> <p><b>% of US Population</b></p>  <p><small>Sources: &lt;<a href="http://www.nationalpainfoundation.org/articles/879/facts-and-statistics?PHPSESSID=961783542e00e5ecb2816ee07685f196">http://www.nationalpainfoundation.org/articles/879/facts-and-statistics?PHPSESSID=961783542e00e5ecb2816ee07685f196</a>&gt;</small></p> <p>This slide makes the same points as the previous slide, but looks much better. Let the slide illustrate what you want to say.</p>

\*you are not restricted to power point presentations.
